

# ENSEMBLE AGISSONS PROJECT REPORT (2024–2025)

Vimukti Charitable Trust® – Empowering Communities, Reaching 21,929 Beneficiaries

## “A Glimpse into Vimukti's Impactful Intervention”

At the heart of VIMUKTI lies a deep, unwavering commitment to uplifting disadvantaged communities. We provide more than just resources, education, and support—we offer hope and a pathway to a better life. Every corner of our facility resonates with the stories of individuals who have found strength and purpose

## Introduction

We are proud to present the 2024–2025 Annual Report of Vimukti Charitable Trust®, Pothnal, highlighting our efforts to uplift marginalized communities in Raichur District, North Karnataka. Focused on Dalits, OBCs, women, youth, and landless laborers, our work spans education, health, child rights, gender justice, skill development, and climate resilience.

This year, we impacted thousands through initiatives tackling school dropouts, child marriage, trafficking, and women's economic empowerment. These achievements were made possible by our team, communities, and generous supporters.

We thank our donor agency, former President Mr Daniel HELBERT, newly President Mrs Maryann PERRONE, Ensemble Agissons members, and all partners. Your support strengthens our mission for a just and dignified society.

## “Healthy Communities, Bright Futures – Annual Health Initiative 2025”

The Annual Health Awareness Program is a comprehensive community initiative aimed at promoting **health education, preventive care, and medical support among vulnerable populations**. Rooted in the belief that knowledge and early intervention are key to a healthy life, this program reaches out to children, adolescents, women, families, and youth through a wide range of awareness sessions, workshops, screenings, and community activities. Throughout the year, the program has addressed critical health concerns including communicable diseases, maternal health,

adolescent development, nutrition and hygiene. By combining health education with access to basic medical services, the program not only empowers individuals with knowledge but also facilitates timely medical referrals and emotional support. Our goal is to build healthier communities by ensuring that everyone, especially those in marginalized areas, receives the information, care, and support they need for a better quality of life.

## Health check-ups and program
